

providing the complete solution

**The management and staff of NCE are committed to;**

- Adopt and aim to apply the principles of “sustainable development” - that is, development which meets the needs of the present, without compromising the abilities of future generations to meet their own needs.
- Seek to continuously improve our environmental performance and where possible set measurable objectives with targets for achievement.
- Foster the commitment of all management and staff to improving the environmental performance of the business.
- Strive to adopt the highest available environmental standards in all countries of operation
- Adopt a total “cradle-to-grave” assessment and responsibility of our products and services
- Aim to minimise the use of all materials, supplies and energy. Wherever possible we will use renewable or recyclable materials and components.
- Minimise pollution produced in all areas of the business,
- Review our transport strategy with regard to reducing our carbon footprint.
- Assess the environmental impact of all our operations past, current and future
- Comply with the applicable legal requirements associated with its environmental aspects and industry requirements.
- Encourage all third parties involved with our business - suppliers, vendors, contractors to promote environmentally friendly working practices.
- Include environmental consideration in investment decisions
- Assist in developing economically - viable solutions to environmental problems in our industry.

**NCE Computer Group (Europe) Ltd has identified the need to pursue responsible policies towards the community and will ensure that the interests of industry will not be served at the expense of the environment.**
